

MDMC Coronavirus Disease (COVID-19)

Was Your COVID-19 Test Ordered Through LabCorp?

We Can Help You Get Your Result

If your Missouri Delta healthcare provider or a telemedicine program ordered a COVID-19 test from LabCorp, your result will be delivered directly to your LabCorp Patient™ account (patient.labcorp.com) as soon as it is available.

* You can create an account (patient.labcorp.com/registration) anytime.

As of July 19, 2020, the current average time to deliver results for the COVID-19 swab test is 3-5 days from the date of specimen pickup. For hospitalized patients, the average time for results is faster.

For the COVID-19 IgG antibody test, the average delivery of test results is 1-3 days from the date of specimen pickup.

If you don't see your result in your account, complete the COVID-19 Inquiry Form (labcorp.com/patient-covid-19-inquiry-form) for a status update.

Your result will also be delivered to the ordering Missouri Delta healthcare provider. Contact your provider with questions about your test result. Results are reported to public health authorities as required.

*Note: If you currently have access to another patient's results as a dependent in your LabCorp Patient account, you will see their result in your account as soon as it becomes available.

Download the LabCorp Patient mobile app.
